

A practical way out of the *COI circle*.

The certificate isn't the decision. A current COI can still leave the question that matters unanswered: **Is this vendor cleared to work — and to be paid?**

1 Read. Pull the insurance requirements from the contract itself — limits, endorsements, additional-insured wording — not from a generic template.	2 Check. Compare the certificate and its endorsements against those requirements line by line. A COI that's current isn't the same as one that's right for the job.	3 Route. State the gap in plain terms and send it to the agent of record. When a vendor can't meet a requirement, the exception goes to a named decision-maker.	4 Clear. Publish one status — eligible, exception, or blocked — with the reason attached, where Risk, Procurement, and AP all see the same answer.
--	---	---	--

BUILT FOR THE HANDOFFS

The circle breaks where the work changes hands.

Every team touches the certificate; none of them owns the answer. The path gives each one the piece it actually needs.

RISK

Decides on evidence, not on email volume. Exceptions are documented and age visibly instead of disappearing into a thread.

PROCUREMENT

Knows a vendor is cleared before the PO is cut — and knows exactly why not when they aren't.

ACCOUNTS PAYABLE

Pays against a status, not a forwarded email. No more asking Risk whether a vendor is "okay."

Structured evidence, not another inbox.

Your records stay where they live — the contract, the ERP, the RMIS. TriCheck sits alongside them, reads the evidence, and returns one continuously current decision. Nothing gets replaced; the chase gets absorbed.

Built by practitioners.

We've sat in the circle ourselves. We're at URMIA to learn where it breaks at your institution — and to shape TriCheck around what higher-ed risk teams actually need, before we build the wrong thing.

SURVEY
QR CODE

Tell us where your circle breaks.

Scan for a two-minute survey — or flip this sheet over and circle your answers. Hand it back to us and we'll follow up with a short demo, and a short call if you want one.

Seven questions. No sales pitch. Every response helps shape TriCheck for higher education.

Where does your *COI circle* break?

Take two minutes. Circle what's true at your institution. Answers get more painful from left to right.

		UNDER CONTROL IN THE CIRCLE			
1	From vendor request to “cleared to work,” how long does it usually take?	☐ Same day	☐ 2–5 days	☐ 1–2 weeks	☐ We don't really know
2	Where do the insurance requirements for a given vendor actually live?	☐ The contract	☐ A standard exhibit	☐ A campus policy	☐ Someone's head
3	Who reviews the COI against the requirement?	☐ Risk	☐ Procurement	☐ The hiring department	☐ Whoever has time
4	When a COI is short — limit, endorsement, date — what happens?	☐ We email the vendor	☐ We email the broker	☐ We forward it and wait	☐ We often let it slide
5	Who approves an exception when a vendor can't meet the requirement?	☐ Risk, and it's documented	☐ A department head, informally	☐ Whoever is asked	☐ Nobody — we just proceed
6	How does Accounts Payable know a vendor is cleared to be paid?	☐ System status	☐ Email from Risk	☐ They ask	☐ They don't check
7	How many renewals per month do you chase?	☐ 0–10	☐ 10–50	☐ 50–200	☐ 200+
8	Where does it break most for you? One sentence is plenty.				

Three or more answers in the right-hand column? *You're in the circle.*

Scan the QR code on the front to see the path out — or hand this sheet to us and we'll follow up with a two-minute demo, and a short call if you want one.

Pays against a status, not a forwarded email. No more asking Risk whether a vendor is "okay."

Structured evidence, not another inbox.

Your records stay where they live — the contract, the ERP, the RMIS. TriCheck sits alongside them, reads the evidence, and returns one continuously current decision. Nothing gets replaced; the chase gets absorbed.

Built by practitioners.

We've sat in the circle ourselves. We're at URMIA to learn where it breaks at your institution — and to shape TriCheck around what higher-ed risk teams actually need, before we build the wrong thing.

SURVEY
QR CODE

Tell us where your circle breaks.

Scan for a two-minute survey — or flip this sheet over and circle your answers. Hand it back to us and we'll follow up with a short demo, and a short call if you want one.

Seven questions. No sales pitch. Every response helps shape TriCheck for higher education.

Where does your *COI circle* break?

Take two minutes. Circle what's true at your institution. Answers get more painful from left to right.

		UNDER CONTROL IN THE CIRCLE			
1	From vendor request to “cleared to work,” how long does it usually take?	☐ Same day	☐ 2–5 days	☐ 1–2 weeks	☐ We don't really know
2	Where do the insurance requirements for a given vendor actually live?	☐ The contract	☐ A standard exhibit	☐ A campus policy	☐ Someone's head
3	Who reviews the COI against the requirement?	☐ Risk	☐ Procurement	☐ The hiring department	☐ Whoever has time
4	When a COI is short — limit, endorsement, date — what happens?	☐ We email the vendor	☐ We email the broker	☐ We forward it and wait	☐ We often let it slide
5	Who approves an exception when a vendor can't meet the requirement?	☐ Risk, and it's documented	☐ A department head, informally	☐ Whoever is asked	☐ Nobody — we just proceed
6	How does Accounts Payable know a vendor is cleared to be paid?	☐ System status	☐ Email from Risk	☐ They ask	☐ They don't check
7	How many renewals per month do you chase?	☐ 0–10	☐ 10–50	☐ 50–200	☐ 200+
8	Where does it break most for you? One sentence is plenty.				

Three or more answers in the right-hand column? *You're in the circle.*

Scan the QR code on the front to see the path out — or hand this sheet to us and we'll follow up with a two-minute demo, and a short call if you want one.

RIGHT-COLUMN COUNT

NAME	INSTITUTION / ROLE	EMAIL
------	--------------------	-------

☐ I'd do a 20-minute call to walk you through our process.

A practical way out of the *COI circle*.

The certificate isn't the decision. A current COI can still leave the question that matters unanswered: **Is this vendor cleared to work — and to be paid?**

1 Read. Pull the insurance requirements from the contract itself — limits, endorsements, additional-insured wording — not from a generic template.	2 Check. Compare the certificate and its endorsements against those requirements line by line. A COI that's current isn't the same as one that's right for the job.	3 Route. State the gap in plain terms and send it to the agent of record. When a vendor can't meet a requirement, the exception goes to a named decision-maker.	4 Clear. Publish one status — eligible, exception, or blocked — with the reason attached, where Risk, Procurement, and AP all see the same answer.
--	---	---	--

BUILT FOR THE HANDOFFS

The circle breaks where the work changes hands.

Every team touches the certificate; none of them owns the answer. The path gives each one the piece it actually needs.

RISK

Decides on evidence, not on email volume. Exceptions are documented and age visibly instead of disappearing into a thread.

PROCUREMENT

Knows a vendor is cleared before the PO is cut — and knows exactly why not when they aren't.

ACCOUNTS PAYABLE

Pays against a status, not a forwarded email. No more asking Risk whether a vendor is "okay."

Structured evidence, not another inbox.
